

Project Coordinator – Patient Safety – MRSA Prevention Initiative

Seeking a self-directed team member to lead the planning, coordination, and implementation of a quality improvement project to reduce and prevent the incidence of MRSA infections among select Florida hospitals.

This individual will work intensively with hospitals by serving as an expert resource on quality improvement methodologies, provide recommendations to improve systems, and provide direct support to assist providers with data collection and reporting to the CDC's National Healthcare Surveillance Network (NHSN).

The successful candidate must have a bachelor's degree in nursing. Hospital Infection control experience or Certified Infection Control Nurse (CIC) and NHSN experience preferred. In addition to knowledge of quality improvement methodologies the ideal candidate should have excellent interpersonal and organizational skills, as well as excellent verbal and written communication skills. Proficiency with Microsoft Office products (Word, Excel, PowerPoint, Outlook) and willingness to travel is expected.
