

The Florida Kidney Disaster Coalition Presents...

All Hazards I: Identifying and Preparing for Potential Emergencies and Disasters

What are hazards?

- Hazards are the events that may lead to emergencies and disasters. A hazard is a “source of danger.”
- Identifying hazards is the foundation to all emergency management activities.
- Natural hazards exist in the environment, like flooding and earthquakes.
- Technological hazards are man-made, like acts of terrorism and hazardous materials spills.

The Florida End Stage Renal Disease Network 

Helps your dialysis or transplant facility comply with the new ESRD Conditions for Coverage by:

- Providing **training & orientation** to staff related to disaster basics
- Presenting an **introduction to disasters**, how to identify them, how they can impact a community, & how to prepare & respond to them
- Assisting in the development of **patient education** materials on disaster preparedness
