

## ✦ The Florida ESRD Network

### Measures Assessment Tool (MAT) Version 1.5

The Measures Assessment Tool (MAT) is a reference tool included in the Conditions for Coverage regulations. The MAT is a guide for current professionally-accepted standards and values for the clinical elements listed in the Conditions.

For individual patient assessments and plans of care, patient target levels should be assessed using the MAT.

For facility-based quality assessment and performance improvement (QAPI), the MAT should be used as a reference guide for community-accepted standards/values associated with clinical outcomes.

Facilities are encouraged to include a copy of the MAT tool in their QAPI program.

The tool has undergone several modifications since released. The most current version **MAT version 1.5** is now available for download from the Florida ESRD Website at: <http://www.fmqai.com/qit.aspx> .

Visit the website for additional tools and resource materials pertaining to the Conditions for Coverage located under “Network 7 Quality Improvement Resources”.
